## PROFESSIONAL SUMMARY

Currently designated as Application Development Analyst in Accenture with 2.4years of overall experience. I started my career as Avionics Software engineer in verification and Validation, later got shifted to Front End side of web development, which helped me in having exposure to the complete model.

In this process, I’ve completely adapted to the IT standards and environment which helped me in dealing complex situations and ability to work even if there are any last minute surprises. Always ready to learn new technologies and to implement.

## SKILLS

- |           |                 |                        |
|-----------|-----------------|------------------------|
| • HTML    | • CSS           | • JavaScript           |
| • ReactJS | • NodeJS        | • Jest/Enzyme          |
| • Cypress | • Java (Basics) | • Tailwind             |
| • DevOps  |                 | • Requirement Analysis |

## WORK EXPERIENCE

**System Engineer** Jun 2020 – May 2021  
Tata Consultancy Services | Bangalore, Karnataka

- Developed a Udemy like web application, for which tech stack included HTML, CSS, JavaScript, ReactJS, Axios, Tailwind, NodeJS.
- Started as a part of track where I used to create design templates in ReactJS, which needs to be rendered on web pages.
- Later got moved to main track of the project where i got hands on ReactJS, Axios, Tailwind, NodeJS.
- I do have experience in Jest/Enzyme to perform Unit Testing for the code developed.
- Debugging the code in the DOM in an efficient way.
- Performing QA for the designs and code, helped me to code in an efficient way, Cypress has been used in performing QA.
- Project is completely under Agile methodology, which helps me to manage tasks in specified time within sprint.
- Have a very good understanding in work management tools like Jira.
- Interacting directly with the client helps me to get clear view of the tasks and I do involve in technical and management discussions.

**Junior System Engineer** April 2019 – May 2020  
Tata Consultancy Services | Bangalore, Karnataka

- Worked as a Verification and Validation Engineer in Avionics domain, wherein I supposed to develop test cases to ensure quality of the code.
- Test cases are developed with thorough analysis and review of Low Level and High Level Requirements.
- HLRT and LLT testing methodologies are adapted to verify quality of the code.
- Development of outstanding Product/Non-Product issues captured against various software components and to ensure compliance with standards.
- Direct interaction with client in technical & management discussions and involving in Systems & Software design reviews groomed me in such a way to deal directly with clients.
- Involving in leading the team by taking the ownership of various tasks and ensuring the Quality of deliverables.
- I do have a very good understanding in work management tools like Integrity, CUTE

**Junior System Engineer - Trainee** January 2019 – Mar 2019  
Tata Consultancy Services | Bangalore, Karnataka

As a part of classroom training, acquired knowledge of JAVA, SQL.
